

ADAM NYBERG

FRONT END DEVELOPER

SUMMARY

I'm a 29-year-old front end developer with expertise in JavaScript, React, and Redux. My focus is on creating dynamic user interfaces, and I have years of experience in building responsive web applications while optimizing performance. I'm dedicated to continuously learning more and staying abreast of the latest technologies and best practices. With strong problem-solving skills and a collaborative approach, I thrive in team environments.

EXPERIENCE

E-GO APP (E-GOGO E-SPORTS AB) | september 2022–present

Front End Developer

- Develop and maintain the company's website using React with Redux and Next.js
- Take architectural decisions for our frontend
- Utilize user feedback to enhance website functionality and usability, while continuously adding new features to improve engagement metrics
- Leverage REST APIs to communicate with our server using JSON, ensuring efficient data exchange and integration
- Participate in planning and prioritizing new projects
- Jest unit testing to assure logic and make future alterations easier
- Contribute to UI/UX decisions using Figma, ensuring optimal user experience.
